## Gran Gasoducto del Sur

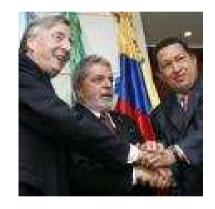

The Geopolitics of Energy in South America

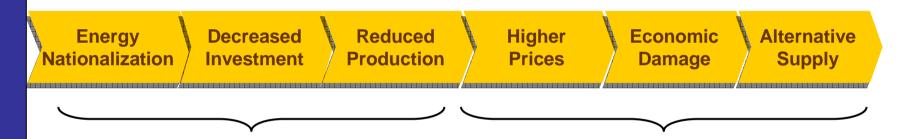

### **Energy Nationalization Risks and Opportunities**

- » Short-Term Drivers: High commodity prices entice producer nations to exercise political and economic control over national resources
- » **Long-Term Consequences:** Can reduce access to capital and technology, jeopardize production, drives consumers away, but creates new supply investment and trade opportunities

#### **Short Term**

#### **Long Term**

**Net Winners:** Producer Nations,

National Oil & Gas

Companies

**Net Losers:** Consumers, Foreign Oil &

Gas Companies

**Net Winners:** Alternate Energy Suppliers

**Net Losers:** Producer Nations,

Consumers, National Oil &

Gas Companies
