

GTL – the “Other Side” of Natural Gas

Andre Peterhans – Venture Manager
Sasol Chevron Qatar

23rd World Gas Conference, 8 June 2006

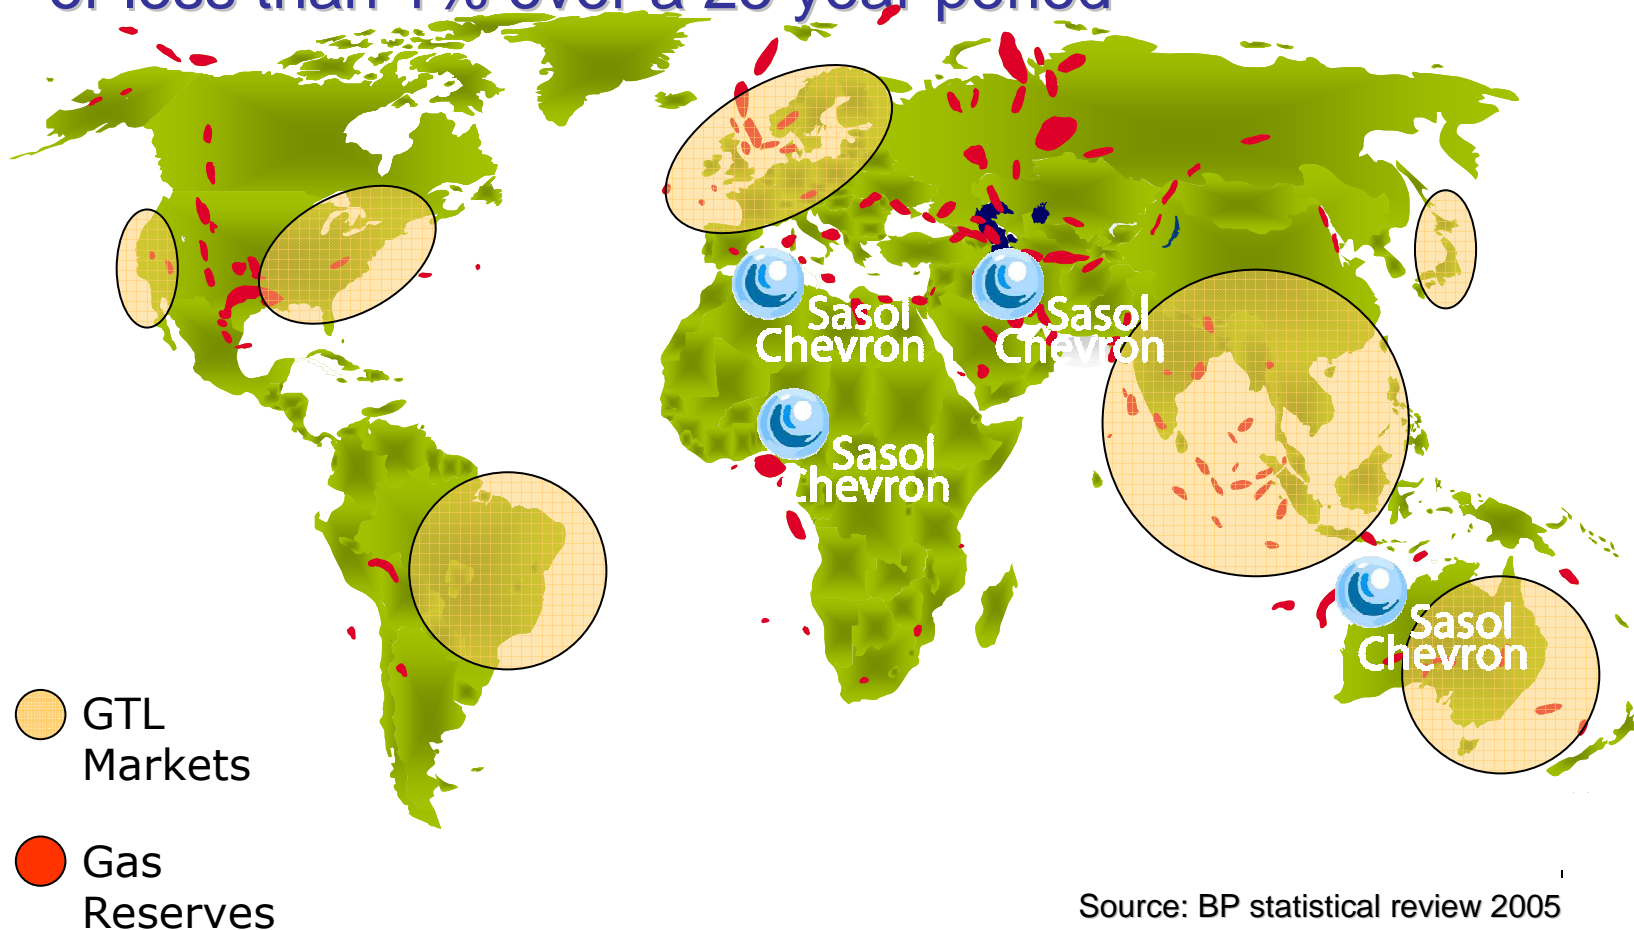

GTL converts natural gas into easily-transportable, ultra clean liquid products

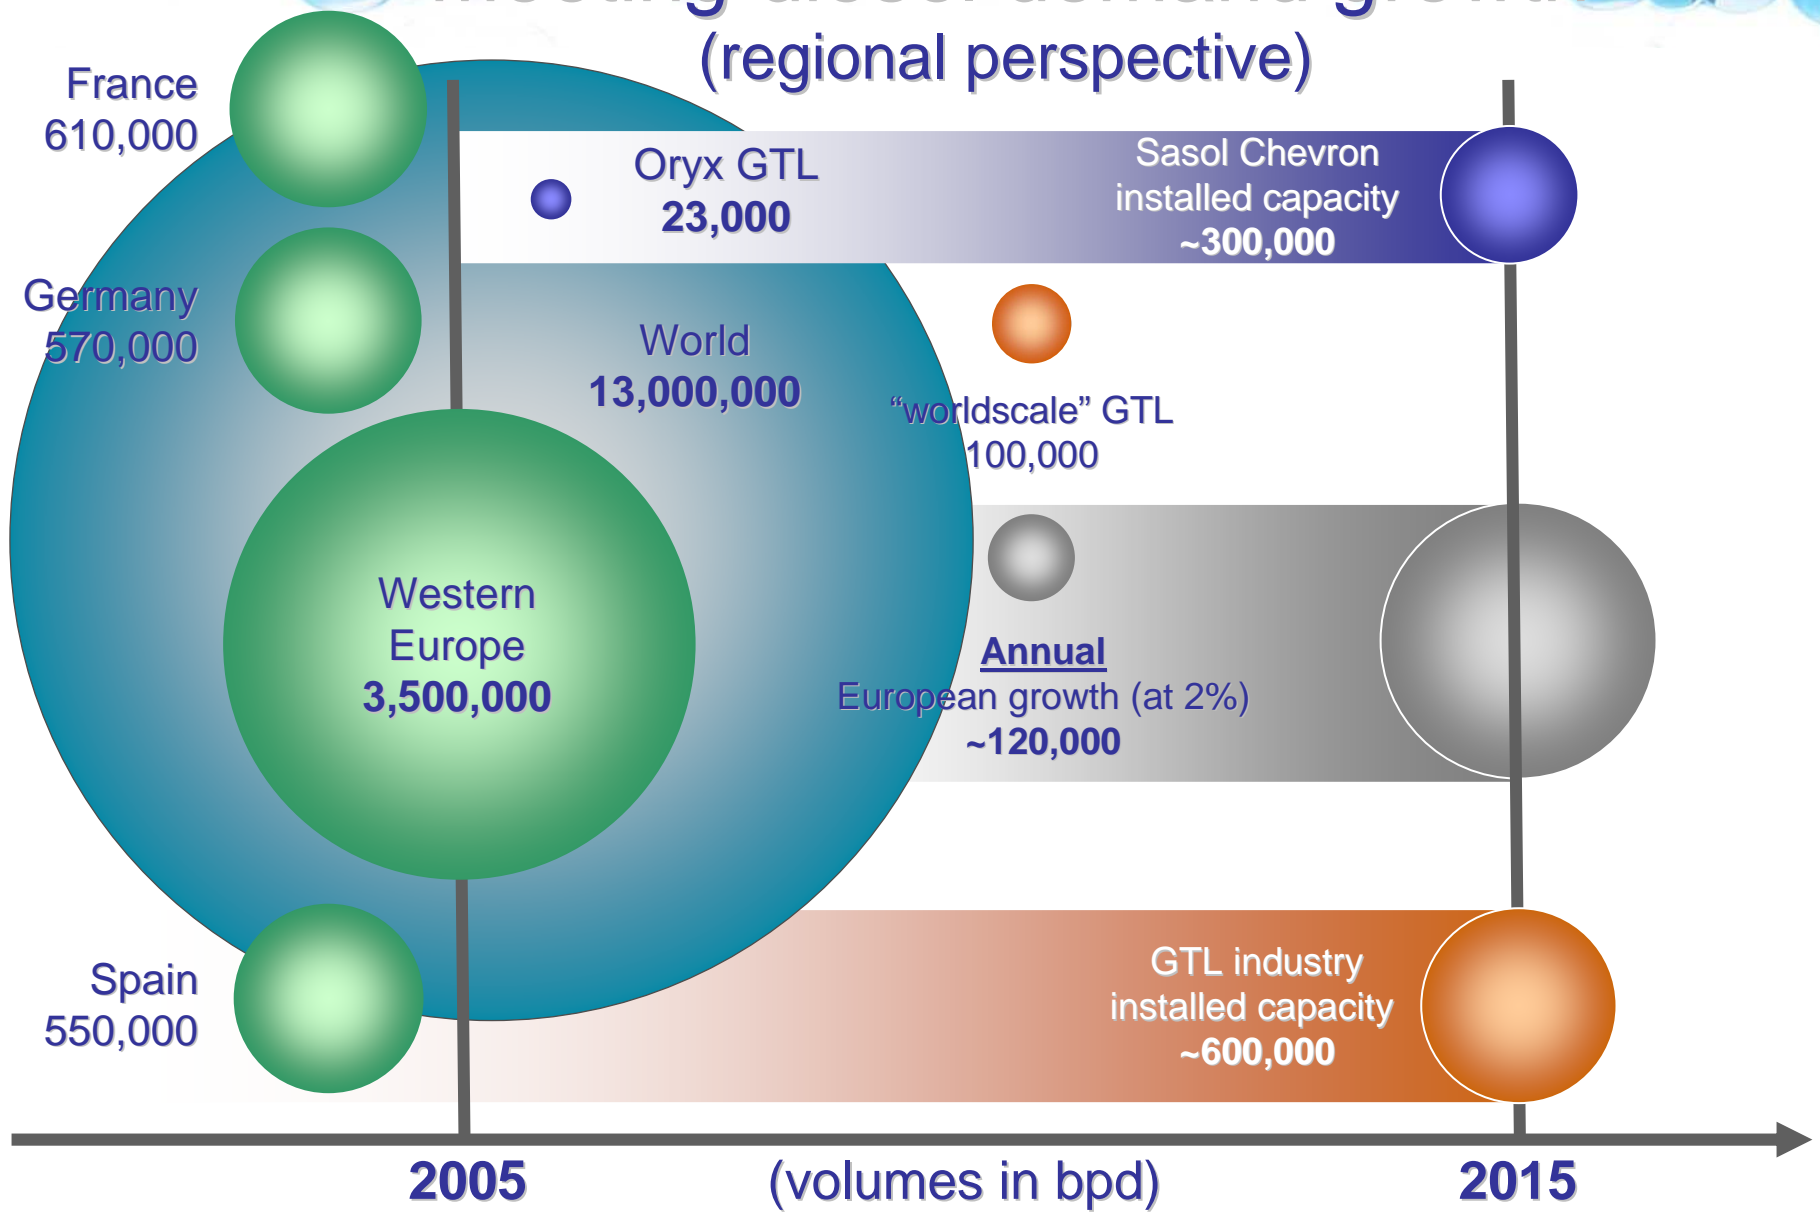

Global Gas Reserves

- approximately 180 TCM proven (2004)
- 500,000 Bbls/ day GTL will consume roughly 1.3 TCM, or less than 1% over a 25 year period

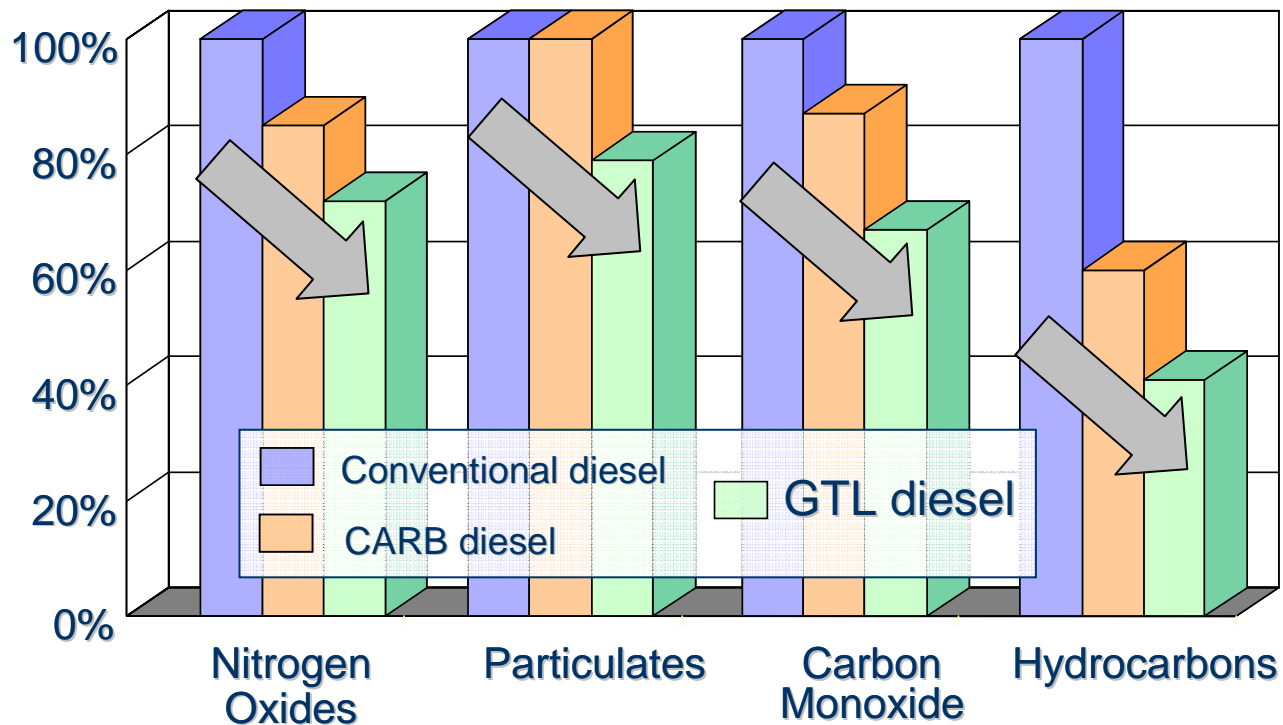

Meeting diesel demand growth (regional perspective)

Environmental benefits of GTL diesel

Cleaner fuel = cleaner exhaust

High quality translates to substantial emissions reductions

(relative benefits depend on engine, exhaust reduction devices, and comparative fuels)
