Contents

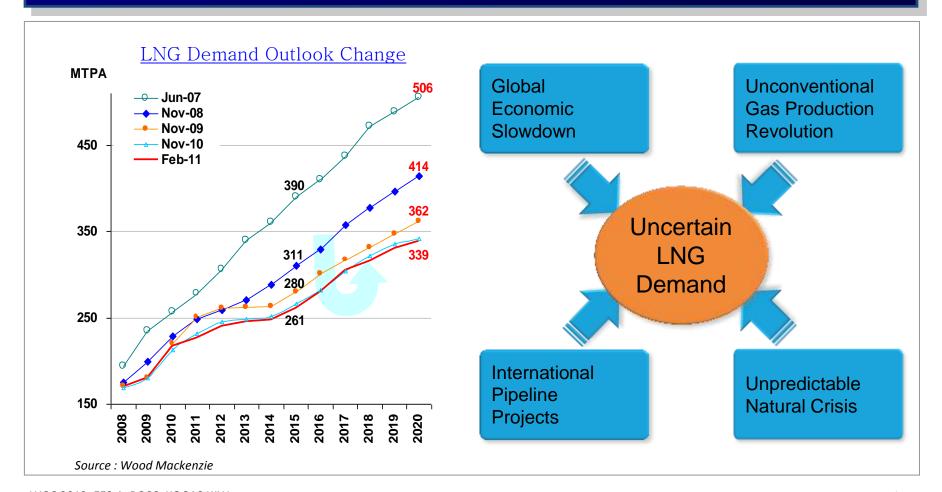

- Increasing Uncertainty in Natural Gas Industry
 - Demand Side vs. Supply Side
- Is It Service Industry or Manufacturing?
- Background of Service Industries
- Two major approaches to the Service Package
 - Servitization vs. Tangibilization
- Convergence Service Directions
- Conclusion

WGC 2012 EF8.A PGCC KOGAS KJW 2 / 14

Uncertainty of LNG Demand

Global LNG demand outlook changes for economic recession, unconventional gas production increase and etc.

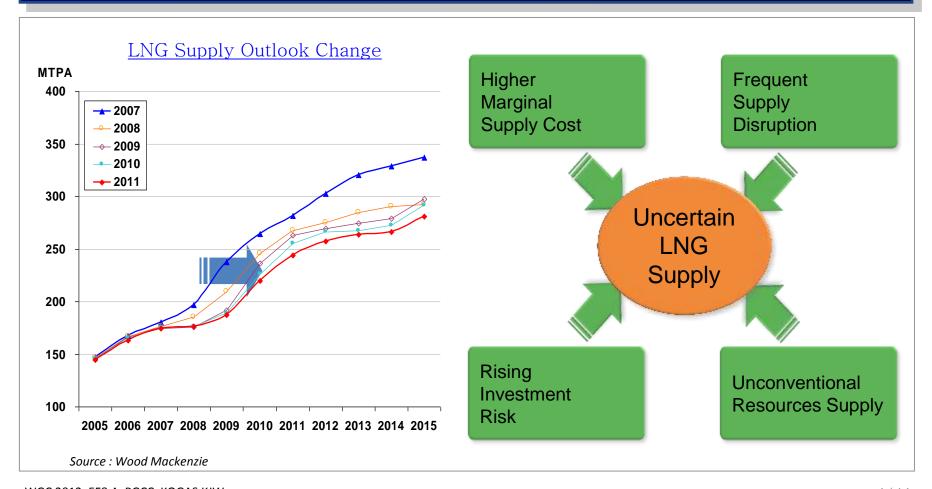

WGC 2012 EF8.A PGCC KOGAS KJW 3 / 14

Uncertainty of LNG Supply

Global LNG supply outlook in mid & long term changes for cost and risk increase; unconventional supply and etc.

WGC 2012 EF8.A PGCC KOGAS KJW 4 / 14

Service or Manufacturing Industry?

Value chains of natural gas industry has wide range across manufacturing and service according to their business context and characteristics

Service?

Manufacturing?

Not Industry, but business!

WGC 2012 EF8.A PGCC KOGAS KJW 5 / 14

Importance of Service Industries

High potential of service industry for development and improvement : perspective change to value creation

Service **Providing Providing Manufacturing** Package **Product** Service **Parts** Overall Production & Value added rate of Service Industry 100 (% ■ 총산출 ■ 부가가치 Customer 64.9 Based New Value Creation 40 Technology 20 Based 이탈리아 캐나다 미국 중국 자료: OECD, The OECD Input-Output Database: 2009 Edition, 2009. 2.

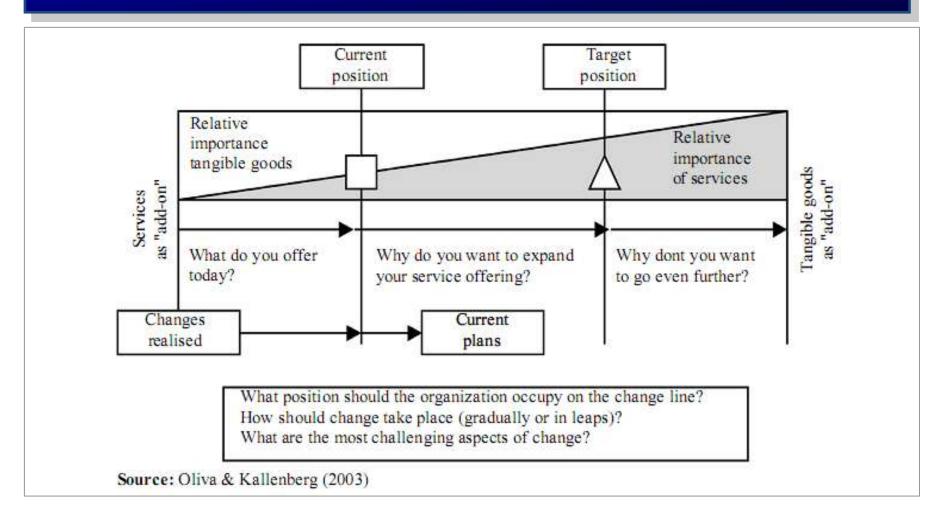

WGC 2012 EF8.A PGCC KOGAS KJW 6 / 16

Direction of Manufacturing: Servitization

Service industries are regarded to have relatively 'more value-added'

WGC 2012 EF8.A PGCC KOGAS KJW 7 / 14

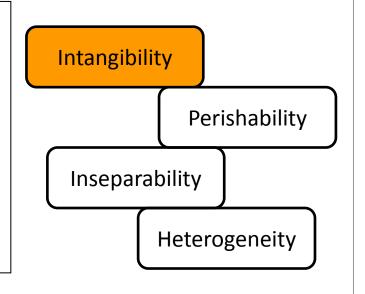

Direction of Intangible Service: Tangibilization

Attempts to tangibilize operational and marketing activities conducted by service companies during the service encounter process to decrease customers' sense of intangibility after the encounter

Basic difference between Service and product

- Customers do not obtain the service possession
- Service provides intangible performance
- Customers are likely to involve service processes
- Other customers can be a part of the service
- High variance in input or output
- Difficulty in assessing service quality
- No inventory or stocks in general
- Components with time have more consideration
- Using various path systems for delivery

WGC 2012 EF8.A PGCC KOGAS KJW 8 / 14

Two Major Views of Tangibilization

Operation-based & Marketing-based Tangibilization

OBT

(Operation-based Tangibilization)

Appearance of Physical Facilities, Equipment, Personnel & Communication Materials

Physical Performance & Environment, and their interactive effects

Encounter Performance
Physical Representation
Process visibility

MBT

(Marketing-based Tangibilization)

Information Frequency
Word-of-Mouth Effect
Substantialization
Factualisation
Quantitation
Ranking

source: Tarn, 2005

WGC 2012 EF8.A PGCC KOGAS KJW 9 / 14

Types of Tangibility in Services

Physical & Mental Tangibility

Physical

Tangible elements

that can be described precisely

and that are subject to physical examination or photographic reproduction or quantitative measure

Mental

dynamic, subjective, and ephemeral And

they cannot be touched, tried on for size, or displayed on a shelf and they are exceedingly difficult to quantify

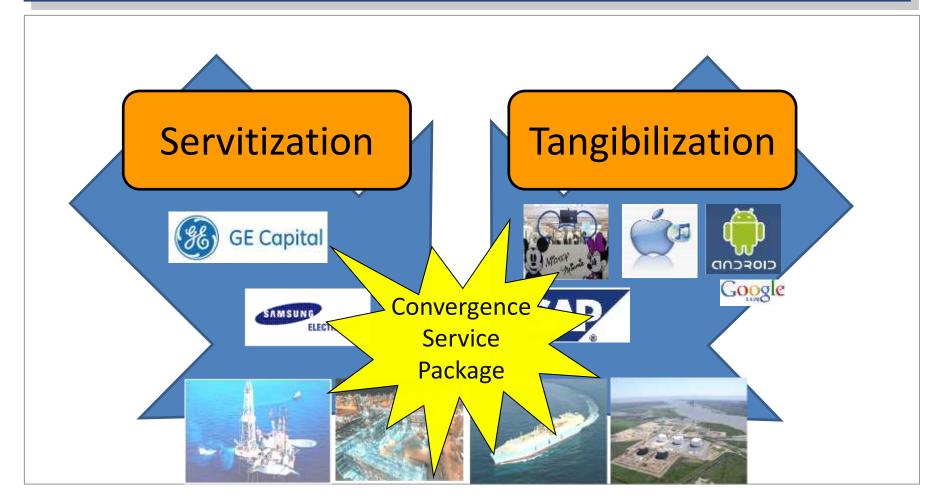

source: Miller and Foust, 2003

To Attain & Sustain Strategic Advantages

From 'Single Energy Supply' to 'Total Energy Service Package' business

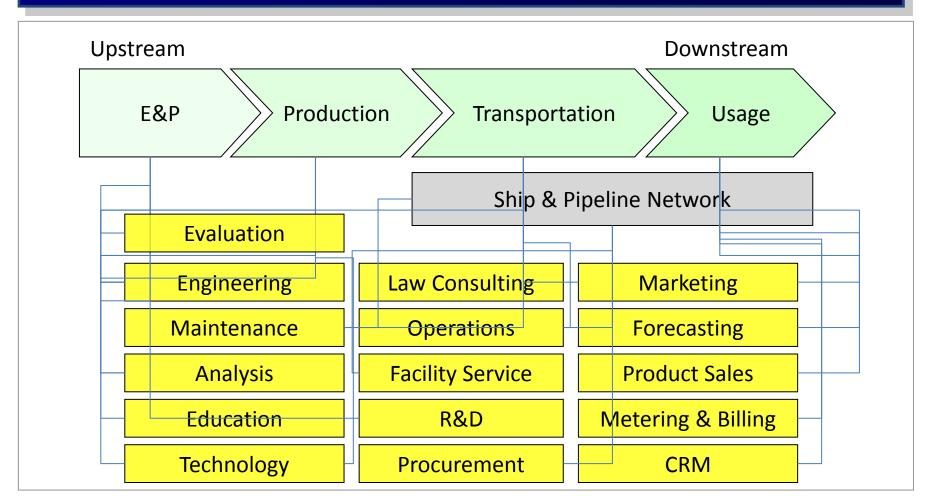

WGC 2012 EF8.A PGCC KOGAS KJW 11 / 14

Convergence Service Direction of Natural Gas Industry

Different directions need to be considered for each business in a comapny

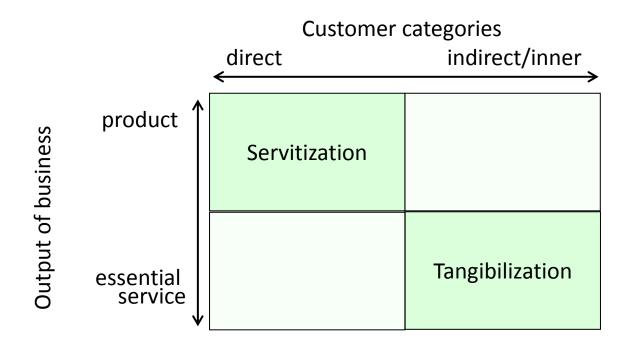

WGC 2012 EF8.A PGCC KOGAS KJW 12 / 14

A Framework for directions of convergence service

The servitization direction fits in the business that is related with direct customers and of which output is closer a pure product The tangibilization direction fits in the business that is related with indirect or inner customers and of which output is closer a pure service

WGC 2012 EF8.A PGCC KOGAS KJW 13 / 14

Conclusion

- Servitization and tangibilization can be the directions for the convergence service of natural gas businesses to solve the given problems
- Common ground of the directions:
 - Customer-oriented service
 - Business context-oriented consideration
- Corporate strategy should be the anchor
 - Each business strategy needs to be aligned with the corporate strategy
 - Customer and output of business can be useful criteria

WGC 2012 EF8.A PGCC KOGAS KJW 14 / 14

Thank you for the listen.
