Weather in Madrid

On the whole, Madrid weather is dry and sunny. Nonetheless, this continental climate is characterized by extremes: July and August are absolutely scorching and the chilly, short winter between December and February surprises most visitors.

The little rain that falls in Madrid tends to be concentrated in October/November and again during the spring (March-May).

Madrid Dining

Regional Madrid cuisine is generally hearty - stews, meats, beans, eggs - and rife with fried options.

The capital's strong point, however, is its wide selection of restaurants and rich tapas culture.
