

## TeleSupervision.

### A mobility solution for remote supervision

- Lower risk of recidivism
- Quality improvement
- Easy to identify best practices
- Faster transmitting best practices
- Standardisation of field operations

Technology for centralized supervision of service lines and short extension of the network works

## Supervision. Digital file of works.

### Standard solution

## What next?

### Future overview

- **Mobility.** More processes will be supervised under mobility technology
- **Dynamic scheduling.** High density and remote areas will have to be optimized through dynamic scheduling
- **New generation communications (4G and beyond) and new sensors will improve remote supervision**
