

IGU Natural Gas Symposium

4 Dec 2011

International Gas Union (IGU) presents

Natural Gas - Powering the Low-Carbon Economy & Facilitating Access to Energy

A Symposium at the United Nations' Climate Change Conference in Durban

Supported by:

energy

Department:
Energy
REPUBLIC OF SOUTH AFRICA

Sponsored by:

e-on | Ruhrgas

Gas – role in mitigation of energy poverty

- Affordable and cost competitive
- Many uses - domestic, commercial, feedstock, power
- Economic growth and employment
- Clean – improves air quality
- Government involvement

 ***Should be included in UN policies***

Messages to Durban delegates

- **Cleanest fossil fuel**
- **Well known and easily transferable technology**
- **Affordable and competitive**
- **Mitigate CO₂ emissions at low cost**
- **Enables wind and solar**
- **Abundant**

Gas: Part of the solution to climate change

More information on www.igu.org

A no-regret climate-friendly energy policy

- Enhance energy efficiency & savings
- Increase the use of gas in power generation and transportation
- Phase in renewable energy
- Develop Carbon Capture and Storage technology

 ***Gas contributes to robust energy policies***
