

**Zapolyarnoye oil and gas-condensate
field becomes most productive field
in Russia – 130 billion cubic meters
per year!**

**IGU, WOC-1
Rio de Janeiro
February, 2013**

Northern Russia Region of Operation – Nadym-Pur-Taz region

Zapolyarnoye field is 50 kilometers long and 30 kilometers wide

Chinese Hangzhou Bay Bridge is world's longest (36 kilometers)

Zapolyarnoye field infrastructure

3.5 trillion cubic meters of gas

80 million tons of gas condensate and oil

Comprehensive gas treatment unit No. 2V in Zapolyarnoye field

Pilot entry under Polar Circle. 1982

**Production facilities,
Zapolyarnoye field nowadays**

The celebrations dedicated to bringing the Zapolyarnoe field to its full design capacity

Production facilities

130 billion
cubic meters
per year!

Zapolyarnoye settlement

Efficiency of developing the existing fields in the traditional Nadym-Pur-Taz region

Production facilities, Zapolyarnoye field

Gazprom has been and remains the number one company in the global gas production

A night landscape featuring a snowy foreground, dark evergreen trees, and a vibrant green aurora borealis in the sky. The text "Thanks for attention!" is overlaid in the center.

Thanks for attention!
