

Triennial Work Programme 2012-2015

Study group results

Sapporo, 27 September 2012

- First study group meeting held in Sapporo, Japan from 25-28 September 2012
- Team members identified and leaders appointed
- Scope and terms of reference developed for all study groups, focusing on technology advancements in E&P for natural gas, and on the assessment of global natural gas resources and reserves
- Third study group created to perform comparative analysis on mineral property rights and gas rent
- High level work plan developed, key milestones identified for the next 3 years aiming at the WGC 2015 in Paris
